Andrew Strom  
N467 297th Street  
Eau Galle, WI 54737

Dear Andrew,

I am writing to request information regarding the use of Closed-Circuit Television (CCTV) cameras in our neighborhood. I have been experiencing a sense of unease and feeling like I'm being watched, and I believe it's essential to understand if CCTV cameras are indeed operational in our community.

According to the HOA's governing documents and bylaws, I would like to know:

Are there any CCTV cameras installed in the neighborhood, and if so, where are they located?

Are these cameras monitored by the HOA, a third-party vendor, or law enforcement?

What is the purpose of these cameras (e.g., security, traffic management, or surveillance)?

Are there any specific areas or zones within the neighborhood where cameras are concentrated?

Are homeowners notified when cameras are installed, repaired, or replaced?

Are there any privacy policies or procedures in place regarding the collection, storage, and dissemination of footage captured by these cameras?

I would appreciate it if you could provide me with a detailed response to these questions, including any relevant documentation or records. As a member of the association, I have the right to know how my community is being monitored and what measures are in place to protect my privacy.

Please respond to this request in writing, and provide any supporting documentation or evidence to substantiate your claims.

**Please provide the requested documentation no later than December 9, 2024.**

Please direct response to PO. Box 42, Eau Galle, WI 54737.

Sincerely,

Scott Ellis
